

AMENDMENTS TO THE CLAIMS\

Claims 1 to 9. (Canceled)

Claim 10. (New) A laminate comprising a film having a thickness of 1-1,000 μm and made of a resin composition containing a polyester and metal foil(s) laminated on one surface or both surfaces of the film,

wherein the polyester has a structure of the formula (5) which is obtained from, as a raw material, a bifunctional phenylene ether oligomer having a number weight of 500 to 3,000 and having a specific structure of formula (1),

wherein each of a and b is an integer of 0 to 30, provided that at least one of a and b is not 0,

-(O-X-O)- is represented by the formula (6), and

-(Y-O)- is an arrangement of the formula (8) or the formula (9) or a random arrangement of the formula (8) and the formula (9),

Claim 11. (New) The laminate according to claim 10,
wherein the resin composition contains the polyester recited in claim 10.

Claim 12. (New) The laminate according to claim 10,
wherein the -(Y-O)- in the formula (1) and the formula (5) represents a structure of the formula (9).

Claim 13. (New) The polyester according to claim 10,
which has a weight average molecular weight of at least 10,000.
